## First Plenary Meeting of ITSERR.

### State of the Art of ITSERR project and Training on Platform/Ecosystemic thinking

ITSERR is the Italian project aimed at enhancing the RESILIENCE Research Infrastructure, whose high interdisciplinarity is finalized to meet the evolving needs of the Religious Studies scientific community by enriching the diversity, the quality and innovation of the knowledge in this specific domain. The project is developed thanks to the collaboration between humanists (experts on History, Philology and Christian, Islamic and Jewish Studies) and IT engineers.

The venue of the meeting is the **Fondazione per le Scienze Religiose Giovanni XXIII**, the initiator and leading institution of RESILIENCE, the interdisciplinary and scientific research infrastructure for all Religious Studies supported by the Italian ITSERR Consortium, funded by the Italian Recovery Plan.

During the two days of work, besides their participation to workshops and round tables, team members will present the state of advancement of each WP of the project and will attend trainings on Platform/Ecosystemic thinking methodology.
